

Athina Bosta, early career researcher and a PhD student in the Department of Product and System Design Engineering at the University of the Aegean, Syros island

No previous experience, keenly interested in joining the ERUA team as a Student Ambassador Research User Experience evaluation practices, focusing on psychophysiological measurements and methods for evaluating interactive physical space environments, utilizing biometric data capture and analysis technologies, a member of the department's Interactive Systems Design Laboratory, book lover and pixel artist

I believe that the involvement of PhD candidates in ERUA activities can enhance the visibility of its events, such as seminars, conferences, summer schools, and more, in the student community. My main priority is establishing relationships of mutual assistance, collaboration, and support within the ERUA and my local insular community.
