### Field of Studies - Psychology

Your hobbies and interests - I am deeply interested in exploring the psychological aspects of identity, which fuels my passion for studying how our minds shape who we are. Running is a significant part of my life. I also enjoy participating in study groups and discussion forums, where I can connect with others and share ideas.

Why did you become an ambassador for ERUA? What inspires you? The sense of community and shared purpose in working towards common goals is incredibly uplifting and motivating for me. I'm inspired by the impact education can have on people's lives. Witnessing how access to quality education can transform individuals and communities motivates me. This is also what inspired me to become an ERUA ambassador.
