

## **Emma THIEBLEMONT**

1- Do you have any previous experiences in ERUA events/activities ? If yes, what were they ?  
I have already participated in events created by erua and I was also lucky enough to be able to participate in creating one. I was able to participate in one of the climate change forum's conference that was presented at Paris 8. As for the event, it was a project that we wanted to set up for International women's day where I had the chance to be able to take care of the posters present.

2- What are your hobbies/interests and what is your major ?

I really like everything related to cinema, I don't think I can call myself a cinephile but I always watch for new releases on Wednesdays and while waiting for the big franchises I have fun giving little fun facts and theories about my favorite films. Another passion that has nothing to do with it, I like baking, it relaxes me.

3- Why did you become an ambassador for ERUA? What inspires you?

I applied to be an ambassador for ERUA because I really enjoyed my few months as a local board member last year, and I hope to meet other people just as incredible as the ones I met and be able to carry out lots of events and projects of all kinds.
