

Judith María Arencibia Cabrera

ERUA Student Ambassador

Field of Studies: Education Sciences

Hobbies and interests: My main interests include education, research, science communication, teaching innovation, and the use of technology in teaching and learning processes. I also enjoy learning, discovering new perspectives, and participating in activities that foster cultural and academic exchange.

Motivation to become an ambassador for ERUA:

I am motivated by the opportunity to actively participate in a European university alliance that promotes collaboration, mobility, inclusion, and the exchange of knowledge among students and universities from different countries.

ERUA inspires me with its commitment to an open, innovative university that is engaged with society. As an ambassador, I would like to help raise awareness of its opportunities, bring them closer to ULPGC students, and encourage greater participation from the university community.
