

Nefeli Moschidou

ERUA Student Ambassador

Field of Studies: Product and Systems Design Engineering

Hobbies and interests: I enjoy travelling, different kinds of movement, sailing, music, creative projects, nature, psychology, philosophy and learning about different cultures and ways of life. I am particularly interested in human-centered and environmentally conscious design, sustainability, spatial experiences and community-oriented initiatives that bring people together.

Motivation to become an ambassador for ERUA: My experience through Erasmus+ and ERUA activities showed me how valuable international collaboration can be.

Meeting students from different countries helped me broaden my perspective and step outside my comfort zone. As an ERUA Ambassador, I would like to encourage more students to participate in these opportunities, connect with people from different backgrounds and contribute to a welcoming and active international student community.
