

Yurima del Mar Ramos Ávila

ERUA Student Ambassador

Field of Studies: Medicine

Hobbies and interests: My dream is to connect with people through science and music. I love reading, singing, traveling, and learning languages.

Motivation to become an ambassador for ERUA:

I want to be an ERUA ambassador because I'd like to do my part for the alliance and continue learning along the way. I'm inspired by the possibility that students from different universities and countries can share ideas and knowledge to build experiences together. I believe that university is a place where we not only acquire academic knowledge, but also learn from the people around us. ERUA represents an opportunity to collaborate, grow, and turn good ideas into real initiatives that benefit the university community.
