

Anna Miakisz

ERUA Student Ambassador

Field of Studies : Psychology

Hobbies and interests: My greatest passion is traveling and discovering new cultures and people. I am also interested in photography, which allows me to capture my trips and encounters. I really enjoy organizing various types of events – it was this drive for action that led me to ESN in the past. In my free time, I also love to cook, experimenting with flavors from different parts of the world.

Motivation to become an ambassador for ERUA:

My previous experience in organizing events for exchange students made me realize how important and enriching international integration is. I am inspired by the energy of people from diverse backgrounds and how much we can learn from one another. I became an ERUA Ambassador to continue this mission, encourage others to be open-minded, and help them fully utilize the opportunities provided by European academic cooperation.
