

Filip Augustyński

ERUA Student Ambassador

Field of Studies : Psychology & Asian Studies:
China and East Asia

Hobbies and interests: Alongside my studies, I am really interested in research and sharing knowledge through university projects. I also enjoy learning about ethics and philosophical aspects of human behavior. In my free time, I like reading, playing musical instruments and listening to music.

Motivation to become an ambassador for ERUA: My personal motto is "seize every opportunity." After taking part in the "Exploring China" course, I wanted to stay involved and help other students discover similar initiatives. With a background in both psychology and Asian studies, I hope to connect students from different backgrounds and encourage them to take part in international projects.
