

Maksymilian Kędzierski

ERUA Student Ambassador

Field of Studies : Management and Leadership,
Master's degree

Hobbies and interests: I'm a curious student and the co-founder and VP of Risewave, a Polish NGO that brings young people and companies together to share knowledge across generations. I also work on startup projects involving AI. In my free time, I train Brazilian jiu-jitsu, travel and go fishing whenever the weather allows.

Motivation to become an ambassador for ERUA:

I believe an international community gives us a chance to learn from one another and see the world from different perspectives. Taking an active part in that exchange inspires me, and I would love to help more students discover the opportunities ERUA offers.
