Nikola Kulig

ERUA Student Ambassador

Field of Studies : Psychology

Hobbies and interests: I am particularly interested in neurobiology and neuropsychology, and I would love to pursue a career in research, exploring new questions and contributing to the discovery of new knowledge. Outside of university, music is an important part of my life, I sing and play the guitar. I also actively engage in various volunteering initiatives, especially those connected with supporting others and building a sense of community.

Motivation to become an ambassador for ERUA: What motivates me most is building spaces where students and academics can genuinely meet, exchange perspectives, and feel part of a shared academic community.

Co-funded by the European Union

I strongly resonate with ERUA's mission of reforming higher education through critical thinking, openness, and active student participation. I see universities not only as places of knowledge production, but as living communities that thrive when dialogue, creativity, and collaboration are encouraged. I became an ERUA Ambassador because I would like to help bring these values to my university and connect students with opportunities to engage in a diverse international community.
