Ora Walkowska

ERUA Student Ambassador

Field of Studies : Psychology

Hobbies and interests: My primary academic interests lie within the fields of neuropsychology and linguistics. What fascinates me the most is their intersection. In my leisure time, I fancy studying languages and am able to communicate in five of them, with varying degrees of fluency. Moreover, I derive great pleasure from travelling and connecting with people hailing from all over the world. I also love reading, with poetry being something I cherish all the more wholeheartedly.

Motivation to become an ambassador for ERUA: I became an ERUA Ambassador due to the fact that I am a firm believer in international collaboration as well as mutual exchange and production of knowledge through it.

ERUA European Reform University Alliance
Co-funded by the European Union

In a world that is ever changing, youth should be included in the discussions and research actively shaping our reality.Additionally, ERUA contributes to causes such as accessibility, which resonates with me deeply. As an ERUA Ambassador, I would like to implement initiatives which foster intercultural learning and embolden intellectual curiosity of our students even further.
